

## ShabbatSmart Price List February 2023

- ShabbatSmart Hot Water Controller can be used with either a single Hot Water cylinder for both weekday and shabbat, or a dedicated cylinder for shabbat use.
- ShabbatSmart Hot Water Controller can be used with both Boiler and Immersion Heater systems.
- ShabbatSmart Hot Water Controller automatically carries out the required actions to prepare the Hot Water Tank for Shabbat conditions. Once ready, the use of hot water does not influence any activation action (directly nor by means of Grama).
- ShabbatSmart Hot Water Controller incorporates a Wi-Fi activation switch, to allow triggering via online Apps. This can also be set by time relation to Sunset.
- ShabbatSmart Hot Water Controller is supplied with a LED, normally installed in the kitchen. The LED illuminates while the hot water is Shabbat Ready.
- ShabbatSmart Hot Water Controller can also be used to disable a mains water booster and open a bypass (if required).
- ShabbatSmart Hot Water Controller includes an Optional program to pasteurise the hot water cylinder once shabbat mode has been deactivated (used when using a dedicated cylinder for shabbat use).

**ShabbatSmart Hot Water Controller**

**£1,050 ex VAT**

**Controller + Pre-Plumbed Cylinder Service (Cylinder not included)**

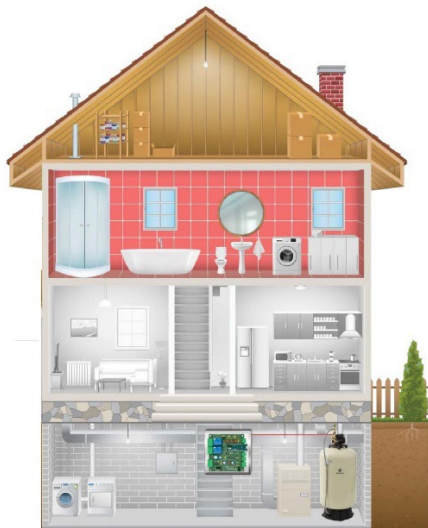

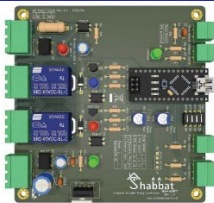

**£2,050 ex VAT**

- ShabbatSmart Foul Water Pump Controller activates the pump at adjustable pre-set time intervals, and de-activates it once the water level drops.
- ShabbatSmart Foul Water Pump Controller ensures that the pump does not run dry for a length of time.
- Using a 3rd party Wi-Fi activation switch, shabbat mode can be triggered via online Apps. This can also be set by time relation to Sunset.
- A Volt-Free alarm signal triggered by a high-level float switch, will provide an indication in case the pump fails to empty the Sump.

### Waste Pump Controller

£380 ex VAT

- ShabbatSmart Water Pressure Boost Controller is certified as Kosher LeMehadrin by Rav Shruga Feivel Zimmerman - Rov and Av Beis Din of Kehillas - Federation Beis Din, London.
- ShabbatSmart Water Pressure Boost Controller allows boosting mains incoming water pressure.
- ShabbatSmart Water Pressure Boost Controller installed on a Stuart Turner Mainsboost Flomate MBF accumulator Vessel and Pump, will deliver up to 24 litres/minute at 3.2 bar.
- ShabbatSmart Water Pressure Boost Controller activates the pressure pump at adjustable pre-set time intervals and deactivates the pump once the accumulator vessel is fully pressurised.
- Frequency of the operation cycle during Shabbos can be set using the onboard rotary switch.
- Using a third-party Wi-Fi activation switch, Shabbat Mode can be triggered via online apps. This can also be set by time relation so Sunset.

### Pressure Pump Controller

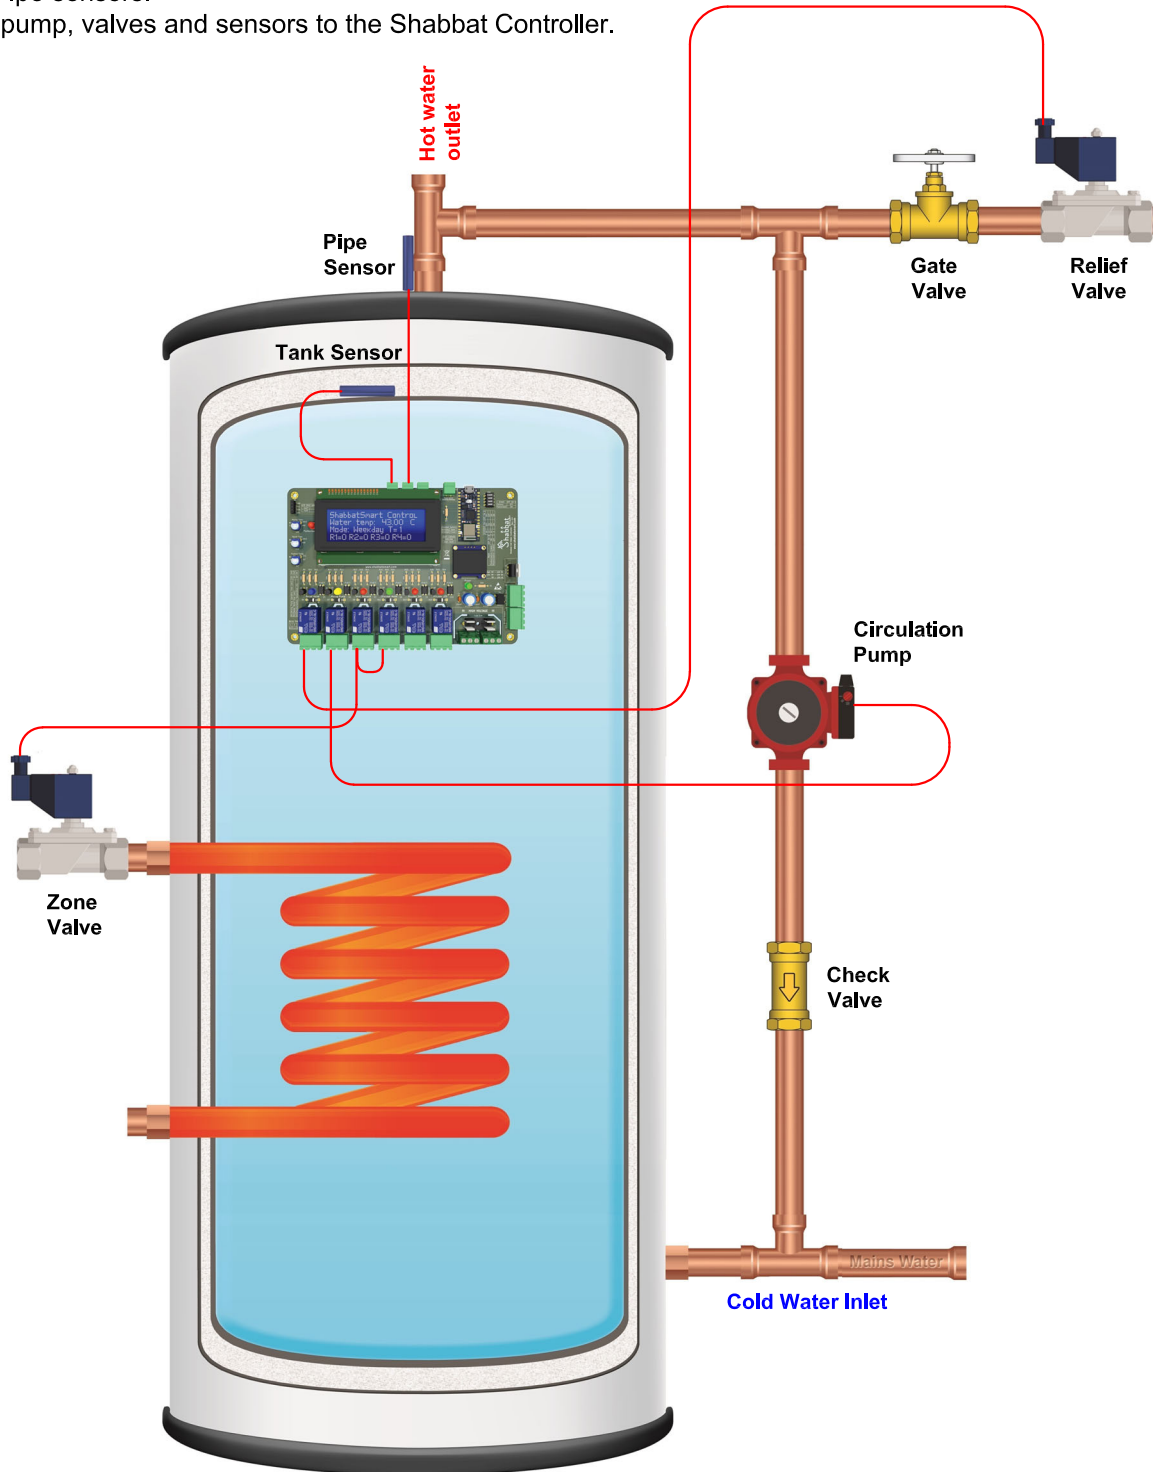

£380 ex VAT

# ShabbatSmart Pre-Plumbed Cylinder Service (Cylinder not included):

- Client to ship the Cylinder to Shabbat Smart Ltd designated address.

Shabbat Smart Engineer to install:

- Install the Shabbat smart box on the Cylinder using a bracket.
- Install the circulation Pipe & Pump, Check valve, Primary motorized zone valve, motorized relief valve & Gate valve, Tank & Pipe sensors.
- wire the pump, valves and sensors to the Shabbat Controller.

**Notes:**

- For the installation of the Tank Sensor - we will cut into the external cylinder casing and insulation (this will not affect the integrity or performance of the cylinder but may void cylinder warranty).
- Shabbat Smart installer will not test if the connections are watertight. Clients site Plumber to check and ensure all connections are watertight.
